## KEMMLIT For every demand

As market leader for washroom cubicles, KEMMLIT offers a variety of high class solutions ranging from cubicles and lockers to entire washrooms. Everything we do is based on a clear commitment to the highest quality regarding products,

our consulting service and installation. What sets us apart is qualified know-how, state-of-the-art manufacturing and innovative design. For these reasons we have received numerous prizes and awards within the last few years.

What can we do for you?

**cronus** support-optimised with recessed supporting legs, in cappuccino 1117

**cronus glass** with supporting legs and headrail in the front, in white green 6504

## **cronus** Cubicle system

cronus is the cubicle system which unites design, and robustness with flexibility. Door and panel elements consist of 13 mm thick water-resistant solid grade (HPL) laminate panels with straight-lined profiles made of satin anodised aluminium. In addition to the coloured decorative layer a special overlay protects from wear, and abrasions as well as scratches. cronus is suitable for wet, humid and dry areas. Due to the intelligent construction

cronus can be utilised according to the individual project requirements. Therefore cronus not only can be implemented as a WC cubicle system, but also as changing cubicle or shower separation in changing areas. All construction details are designed for high class appearance and years of failure-free functioning. A solid three-roller edge hinge made of high quality aluminium bolted six-times has been developed for cronus, which can

withstand the strongest of demands for years. All doors can be created optionally as self-closing or self-opening. The supporting legs made of aluminium with stainless steel floor plate and aluminium cover sleeves are continuously height adjustable for optimal alignment to inclining floors. As an alternative to solid grade laminated panels we offer the high-class cronus glass solution made of 12 mm toughened safety glass for front and side panels and 8 mm toughened

safety glass for partition panels and doors. cronus glass is ideal for discerning builders, designers and planer, who wish to combine the advantages of glass with the stability and longevity of cronus.

**cronus** meets the demands according to the DGNB

**cronus** with supp. legs and headrail in the front and with finger protection, in light grey 7208

## **cronus** Sustainable

**cronus** meets the demands according to the **DGNB** and not only contributes to sustainability, but also to your building certification: the Deutsche Gesellschaft für Nachhaltiges Bauen e.v. (German Society for Sustainable Building, registered society) is a certification system for sustainable and economically efficient building in Germany.

It serves the impartial description and evaluation of the sustainability of buildings and city districts. It is essential that the DGNB system never assesses single measures but always the overall performance of a building or city district. Furthermore KEMMLIT has been certified according to **DIN EN ISO 14001** and

thereby places emphasis on the area of environmental management. The ISO 14001 norm defines environmental management requirements, which enable a company to improve its environmental performance, fulfil legal and other obligations and reach environment objectives.

## **cronus** Standard

The standard solution for **cronus** is created with supporting legs and head rail situated at the front. The under panel clearance consists of 150 mm with an adjusting range of -5/+25 mm for the best possible alignment for inclining floors. The supporting legs consist of high-quality aluminium with an aluminium or nylon cover sleeve. They are connected via a force-lock to the floor and the aluminium frame construction.

**cronus** support-optimised with recessed supporting legs, in lemon green 6715

## **cronus** Support-optimised

As an alternative cronus is available as a support-optimised construction, in which the supporting legs are situated in the partition panel. Invisible to the observer, visually perfect and easy to clean.

**cronus changing cubicles** with central locking and individual digital print

## **cronus** Changing cubicles

cronus is ideally suitable for dry, humid or wet areas, as shower or changing cubicles as well as communal changing cubicles for outdoor and indoor swimming pools, leisure pools, spa and rehabilitation facilities, camp sites and fitness studios.

The changing cubicles are outfitted with bench seating and central locking system to close both cubicle doors. At customer request the cubicles can be additionally outfitted with mirrors, shelves or climb-over protection.

**cronus Glas**, in traffic white 9317

# cronus Glas

The sophisticated cronus glass solution consists of 12 mm toughened safety glass front and side panels as well as 8 mm toughened safety glass partition panels and doors. The basis of this cubicle solution is the supporting construction made of satin anodised aluminium profiles which mount the cubicle elements.

The result is an extremely sturdy and long lasting partition system made of genuine glass. cronus glass can either be used as WC cubicles, changing cubicles or shower partitions. On request the option of combining the cubicle system with solid grade laminate HPL panels and glass elements is available.

# cronus NR Details

In the developing stage particular attention was paid to the connection elements and details. The high quality aluminium system structure with the aesthetic profiles and linear connections guarantees a robust and solid cubicle system.

**Door inner face:** aluminium lock plate with FeelSafe indicator

**Door outer face:** aluminium door knob with indicator

**3-roller edge hinge** made of aluminium with stainless steel axis

**Finger protection** with integrated hinges

**Aluminium supporting leg** in the front – in a static connection with the profiles

**Wall connection profile** with cover sleeve for custom-fit joint pattern

## cronus NR Details

### Your advantages:

- ✓ Lock plate made of high quality aluminium
- ✓ WC lock made of metal, non-wearing and long-lasting
- ✓ The lock is very solid, non-flammable and corrosion-free
- ✓ Door knobs made of nylon, aluminium or stainless steel
- ✓ In addition our free-/occupied indicator on the inside of the cubicle ("FeelSafe") offers you a sense of security

### Your advantages:

- ✓ The doors cannot be unhinged
- ✓ Maintenance-free bearing
- ✓ Vandal proof
- ✓ High stability
- ✓ Very long-lasting
- ✓ Non-flammable
- ✓ Self-closing or self-opening

### Your advantages:

- ✓ The doors cannot be unhinged
- ✓ Prevents fingers from being jammed
- ✓ Vandal proof, maintenance-free

### Your advantages:

- ✓ With solid stainless steel floor plate
- ✓ Multiple screw connections
- ✓ Outstanding stability and longevity due to static connection with M12 screw connection
- 100 % corrosion free

### Your advantages:

- ✓ Attractive design
- ✓ Lasting stability due to three-chamber profile
- ✓ No visible joints due to cover sleeve

**Modesty screens** made of glass with supporting leg

## cronus Fittings

Modesty screens are being included more and more into washroom or WC areas. Next to hygiene, privacy in particular plays a large role. cronus also offers individual solutions for this. The modesty screens can be realised in special widths and heights, with or without supporting legs. With our extensive accessories,

such as paper roll holders or door stopper hooks the cronus cubicles can be outfitted completely. The accessories are available either in stainless steel, aluminium or nylon. Theft proof screw connections as well as harmonising colours and designs. The placement of the accessories is already considered within the overall planning.

**cronus** suspended, doors made of TSG in white green 6504, panels made of HPL in quartz grey 7708
